# High-Density, Managed Ethernet to DS3/E3 Rate Converters

## For Wireless, Optical and Wired Applications

March 6<sup>th</sup>, 2014 -- Models V5.4-6c/20c

### Technical Specifications

#### General

With up to **40 channels** of **variable-topology** and fault-tolerant **jumbo-GbE** to DS3/E3 conversion in a manageable, carrier-class chassis, the E3Switch multi-card Model 6c/20c provides a high-reliability and high-flexibility option for central office applications. Continuous operation is maintained with **hot-swappable dual or mixed AC/DC supplies**, hot-swappable conversion cards, and independent **SNMP management of chassis temp/power/fan** with last-gasp notification. Per-card single or dual jumbo-frame copper/SFP LAN ports feed bonded or isolated DS3/E3 ports in a variety of **user-configurable VLAN or failover topologies**. Pair this multi-slot chassis with similar or single-units at the remote location.
